OUR TASK FORCE FOR THE MINING INDUSTRY

CROSS-FUNCTIONAL TEAM OF LUBRICATION EXPERTS

Chevron formed the Asia Pacific Mining Task Force (APMTF), a group made up of elite lubrication specialists in our region. This is to cater to the lubrication needs of the mining industry, which is faced with demanding operational challenges.

Our team has extensive knowledge and experience in:

- Product Innovation and Development
- Onsite Equipment Monitoring
- Onsite Diagnosis and Troubleshooting
- Training and Development
- Regional Supply Chain Operations and more

We leverage our **RBL™ program** to help you identify the right products, tools and services to extend mining equipment lifecycles, improve durability and improve fuel efficiency to help reach your business goals. We can also share industry best practices based on success stories with our customers from around the world.

RBL™ PROGRAM

RUN BETTER LONGER

It's our commitment to help you increase equipment uptime and component service life. Our Asia Pacific Mining Task Force is the expertise behind this program for the mining industry. Alongside with world-class products and targeted services, we can help your mining equipment and operations Run Better Longer.

Experience the difference that our APMTF and the RBL™ Program can bring to your operations and businesses. Call us for a free consultation and a chance for a complimentary lubrication audit worth up to USD20,000*.

How the RBL™ Program works

Step 1	Understanding your business drivers and recommend the best products and services to address operational challenges identified.
Step 2	Developing the right RBL™ program with Best-in-Class (BIC) assessment.
Step 3	Documenting the opportunity with a transition plan to smoothly integrate current operations into the program.
Step 4	Executing the RBL™ Program with you to properly implement the recommended products, services and equipment in full and on time.
Step 5	Tracking and documenting results with regular reviews. This helps to continuously identify ways to maximize your lubrication investments.

MEET THE TEAM

Tony Casas
Manager - Mining Business & Support, Asia Pacific

A mechanical engineer and a 25-year Chevron veteran, Tony has extensive knowledge of mining operations and critical equipment such as draglines, rope and hydraulic shovels, drills, grinding mills, and open gears, among others. He is currently responsible for providing consultancy and onsite lubrication solutions to many of our mining customers across Asia Pacific. He is also a trusted partner of Chevron's specialty products development team, where he shares the needs of our customers' in the mines. Tony is based out of Australia and travels to mines in the region frequently.

Rushikesh Sawant
Product Technical Support
Asia Pacific

Rushikesh has more than a decade of experience in lubricants and additive industry and specializes in technical support for the heavy industries and mining segment. His formulation experience spans across automotive and industrial applications. His work includes collaboration with R&D center to build relevant portfolio of products for the mining industry equipment. Rushikesh also conducts training for our mining customers.

Dr. Simon Chung
Product Technical Support
Asia Pacific

Simon has 15 years of experience in the development of new additives, formulations and lubricant products for automotive engines. He is currently responsible for our heavy duty diesel engine oils and hydraulic oils portfolio. Other than being one of our key product trainers for our mining customers, Simon is also the co-author of several patents and technical papers.

The In-Country Experts

While we have a group of regional experts behind the program, we believe that we need to be close to our customers. Our Sales and Technical colleagues based in the countries are trained and their knowledge and skills are continually honed by the regional experts through our APMTF efforts. Most of our technical managers are Certified Lubrication Specialists™ by STLE.

They will work hand in hand with you to develop the right RBL program. They have years of experience servicing mining accounts of various sizes across Indonesia, Thailand, Laos, Philippines & China. They understand the mining operations in their markets like no other.
